

# Hetzner apt update: failed to fetch

Fehler bei `apt update` auf einem Hetzner arm Server:

```
E: Failed to fetch https://mirror.hetzner.com/ubuntu/packages/dists/jammy-updates/main/binary-arm64/Packages 404 Not Found [IP: 2a01:4ff:ff00::3:3 443]
E: Failed to fetch https://mirror.hetzner.com/ubuntu/packages/dists/jammy-backports/main/binary-arm64/Packages 404 Not Found [IP: 2a01:4ff:ff00::3:3 443]
E: Failed to fetch https://mirror.hetzner.com/ubuntu/security/dists/jammy-security/main/binary-arm64/Packages 404 Not Found [IP: 2a01:4ff:ff00::3:3 443]
E: Some index files failed to download. They have been ignored, or old ones used instead.
```

Lösung:

[https://www.reddit.com/r/hetzner/comments/1f3iz9f/e\\_failed\\_to\\_fetch\\_httpsmirrorhetzner\\_when\\_doing/](https://www.reddit.com/r/hetzner/comments/1f3iz9f/e_failed_to_fetch_httpsmirrorhetzner_when_doing/)

Fixed with this:

Run command:

```
sudo nano /etc/apt/sources.list.d/ubuntu.sources
```

Scroll down until you find URI:s like this:

```
URIs: https://mirror.hetzner.com/ubuntu/packages
```

```
URIs: https://mirror.hetzner.com/ubuntu/security
```

Change them to:

```
URIs: https://mirror.hetzner.com/ubuntu-ports/packages
```

```
URIs: https://mirror.hetzner.com/ubuntu-ports/security
```

ctrl x to save the file and press y if asked

Now doing updates should work.

>>

I had to edit the ``/etc/apt/sources.list`` file instead of ``/etc/apt/sources.list.d/ubuntu.sources`` in the Arm based Ubuntu Machine that I was running.

Posting this as it might help someone.

also `nano /etc/apt/sources.list` > alle links mit `hetzner.com/ubuntu/...` in `.../ubuntu-ports/...` ändern
