

# ERROR: Update package database

TASK ERROR: command 'apt-get update' failed: exit code 100

Auf dem Proxmox Host folgende Dateien bearbeiten:

```
nano /etc/apt/sources.list.d/pve-enterprise.list
```

```
nano /etc/apt/sources.list.d/ceph.list
```

Außerdem auch in alle anderen Dateien im `/etc/apt/` Ordner schauen, ob noch irgendwo weitere pve-enterprise Einträge sind!

Zeile mit `Enterprise.proxmox` auskommentieren:

```
GNU nano 7.2
# deb https://enterprise.proxmox.com/debian/pve bookworm pve-enterprise
```

speichern. Danach sollte unter Proxmox > pve host > Updates > Refresh wieder funktionieren:

PROXMOX Virtual Environment 8.0.3 Search
