das hat bei mir geholfen, nachdem sich beim täglichen Backup eine VM aufgehängt hat und ich mich danach nicht mehr auf der Web-UI einloggen konnte:

(auf dem Proxmox Host)

```
systemctl stop pve-cluster
rm -f /var/lib/pve-cluster/.pmxcfs.lockfile
systemctl start pve-cluster
```

evtl auch volle Festplatte. Prüfen mit `df -h`

Fehlerlog beim Backup:

`ERROR: Backup of VM 109 failed - unable to open file '/etc/pve/nodes/proxmox/lxc/109.conf.tmp.3820825' - Input/output error`

ausführlich:

```
